

Settings for Microgaming casinos

Install your poker client in **English** language!

Open any table, click Menu, and select Mini View. Then click Menu again and select “Use as default view”.

After this, your tables should look like this:

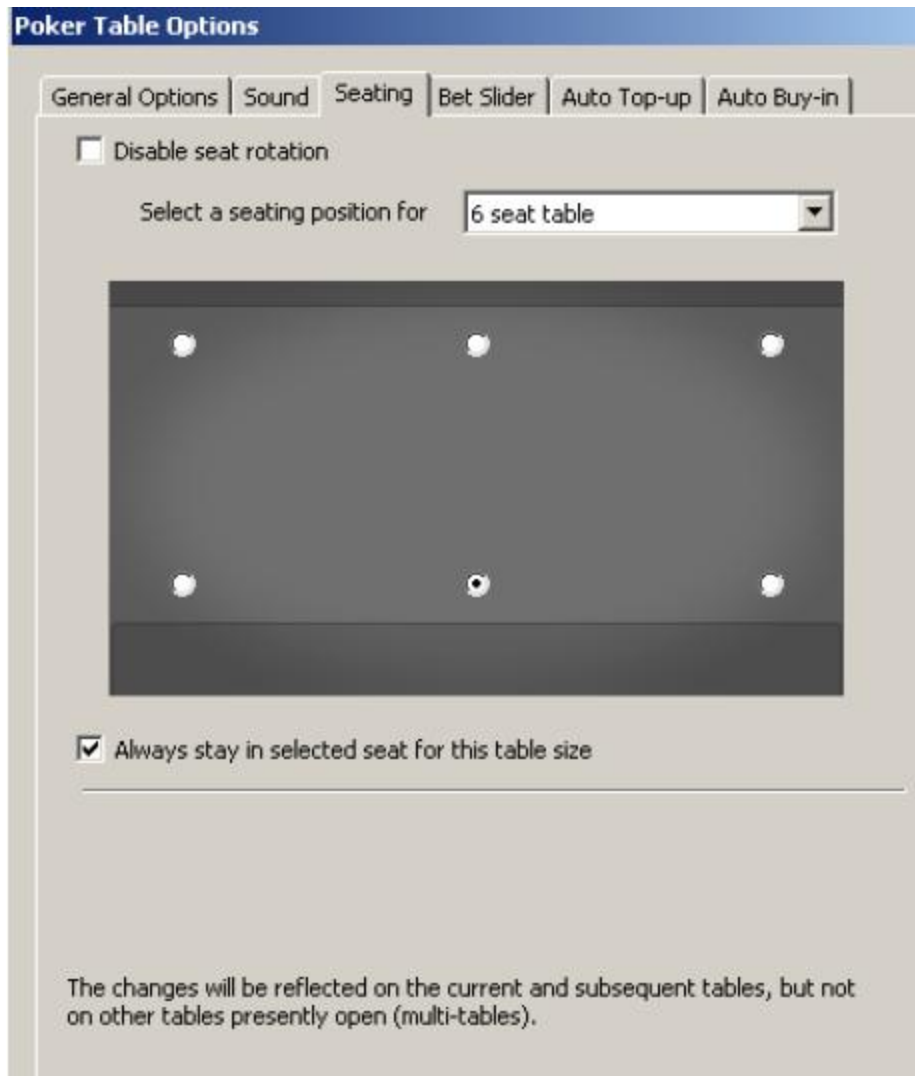

Click Menu – Options:

Poker Table Options

General Options | Sound | Seating | Bet Slider | Auto Top-up | Auto Buy-in

- Queue Table Actions
Tables are queued according to the time left for you to make a betting decision. Only once you make a decision on the active table will the next table in the queue be activated.
- Force Table to the Foreground
When a table action is required the table will pop up in front of the active application.
- Keep Folded Cards Visible
Select to keep your cards visible if you fold in the middle of a hand. Your cards are grayed out and marked as folded.
- Show Rabbit Cam Cards
Select to show the next card you would have received, if the hand ends when 3 or 4 cards are on the table.
- Hand Description
Describes your current hand. (only YOU can see it!)
- Four Color Deck
- Enable Fold and Show

When joining tables, make sure that "Autopost" and "Wait for BB" are checked (with right settings it should be always checked)
