

# WPN Settings

For security, the system settings are different.

The screenshot shows the Windows System settings page. The left sidebar contains navigation links: Control Panel Home, Device Manager, Remote settings, System protection, and Advanced system settings. The 'Advanced system settings' link is highlighted with a green box, and a green arrow points from it to the text 'click 2'. The main content area is titled 'View basic information about your computer' and displays system information under several sections: Windows edition (Windows 10 Pro), System (Processor, Installed memory, System type, Pen and Touch), Computer name, domain, and workgroup settings (Computer name, Full computer name, Computer description, Workgroup), and Windows activation (Windows is activated, Product ID). The Windows 10 logo is visible in the top right of the main content area.

The image shows a Windows 10 desktop environment. In the background, the Control Panel window is open, displaying the 'System' page with the heading 'View basic information about your computer'. The 'System Properties' dialog box is overlaid on top, with the 'Advanced' tab selected. A green box highlights the 'Settings...' button in the Performance section, with a green arrow pointing to it and the text 'click 3'. The dialog box contains the following sections:

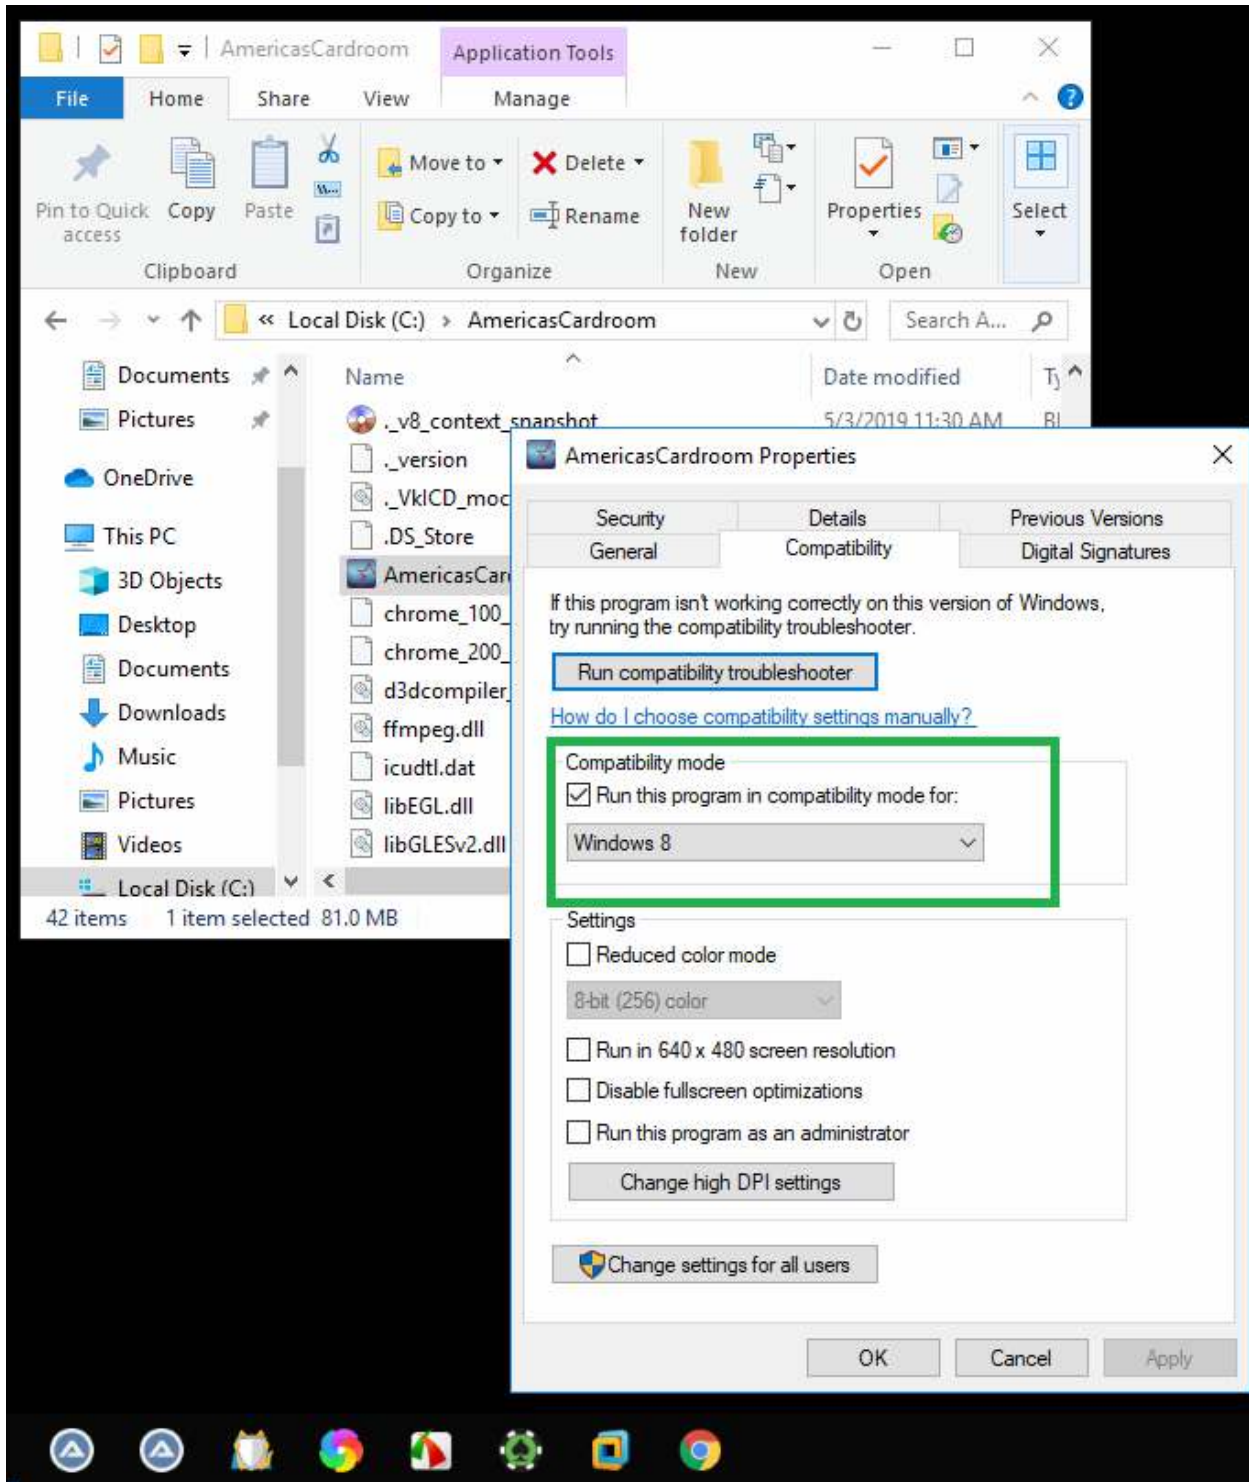

- Performance:** Visual effects, processor scheduling, memory usage, and virtual memory. A 'Settings...' button is highlighted.
- User Profiles:** Desktop settings related to your sign-in. A 'Settings...' button is visible.
- Startup and Recovery:** System startup, system failure, and debugging information. A 'Settings...' button is visible.
- Environment Variables:** A button labeled 'Environment Variables...'.

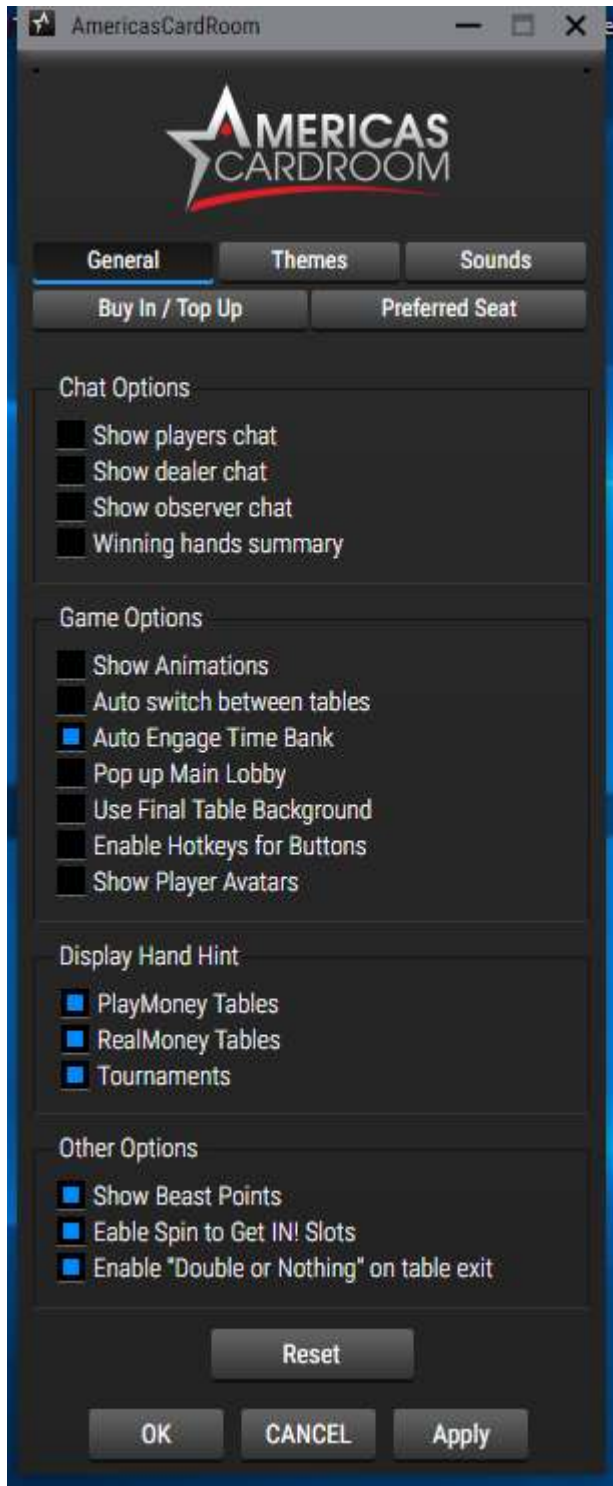

At the bottom of the dialog box are 'OK', 'Cancel', and 'Apply' buttons. The background Control Panel window shows various system information on the left and navigation options on the right, including 'Change settings' and 'Change product key'.
